Dear Voldex

I am thrilled to apply for the QA Tester position. I discovered this opportunity through your company's page.

I am a perfect fit for this role due to my eagerness to learn and my excitement about the opportunities offered. With a BCIS in Game Design and Development from the IIE Vega School and extensive experience in creating VR mining training simulations, I bring expertise in Unity, Blender and Substance Painter.

My skills in C#, game design and asset creation are well-honed, making me a valuable addition to your team.

I am excited about your company because I share its values and commitments. I am eager to be part of your day-to-day operations and contribute to your success. I am enthusiastic about bringing my energy and creativity to the tasks at hand.

I am very interested in the QA Tester position and believe my qualifications align well with the job requirements.

I am available for an interview at your earliest convenience.

Regards,

Monthati
